SASWATI GHOSH

gsaswati99@gmail.com | +91-8250366865 | www.linkedin.com/in/saswati99

Gen AI Engineer | ML & AI Practitioner | Cloud & AI Enthusiast

Skills

AI & Machine Learning: *GenAI, Machine Learning (ML), Deep Learning (DL), RAG, MLflow, Data Version Control (DVC), Model Deployment, Prompt Engineering, Agentic AI Systems, Natural Language Processing (NLP), Vector Database, LLM, TensorFlow, Pytorch*
Cloud: *AWS (S3, EC2, Lambda, DynamoDB, SNS, Textract, EKS), Azure AI, Google Cloud, FastAPI*
DevOps & CI/CD: *Docker, Kubernetes, Jenkins, GitHub, GitHub Actions, Infrastructure as Code (IaC)*
Languages: *Python, SQL/MySQL, JavaScript, Bash, Git*
Monitoring & QA: *JIRA, Logging/Monitoring (CloudWatch, Prometheus), Quality Assurance, Change Management*

Education

Cooch Behar Government Engineering College **2018-2022**

- ***Bachelor of Technology*** *in Electronics and Communication Engineering, Aggregate:* ***9.21***

Work Experience

Cognizant | Associate **Oct'22- Present**

- ***Designed and implemented end-to-end RAG pipelines*** *for enterprise applications, enabling contextual retrieval from ServiceNow knowledge bases, Jira tickets, and internal documentation using* ***LangChain, LangGraph, OpenAI GPT models, and FAISS****.*
- ***Built a GenAI-powered chatbot*** *to handle application-based user queries (healthcare policies cases), integrating* ***LLM reasoning*** *with vector search to improve response grounding and reduce manual triaging effort.*
- ***Developed multi-step LLM orchestration workflows using LangGraph****, enabling prompt chaining, tool invocation, structured query handling, and hallucination reduction for enterprise support systems.*
- ***Engineered cloud-integrated AI solutions on AWS and Azure****, leveraging serverless compute (Lambda), secure REST APIs, and managed storage to support scalable AI-driven workflows.*
- ***Implemented role-based access control and token validation mechanisms*** *to secure LLM-powered endpoints and ensure compliant access to enterprise data sources.*
- ***Established evaluation and performance optimization frameworks for RAG systems****, refining chunking strategies, metadata filtering, and top-K similarity search while measuring retrieval precision/recall and response quality for continuous improvement.*

Projects

Rural Healthcare Diagnosis Assistant | Flutter, FastAPI, MLflow, PyTorch, Docker

- *Built a cross-platform mobile app using Flutter to assist rural health workers with AI-powered symptom analysis and lab report interpretation.*
- ***Implemented offline-first support, multilingual NLP (BERT****), and urgency classification using* ***MLflow*** *tracked models.*
- *Securing user data with encryption and ensuring compliance with HIPAA / Indian DPDP laws.*
- *Backend powered by* ***FastAPI + PostgreSQL,*** *deployed via Docker & Kubernetes.*

Smart Doc Intelligence | AWS, Gemini AI, NLP, Document Intelligence

- *Designed and developed an end-to-end intelligent document analysis system using AWS services (****S3, Textract, DynamoDB, SNS****).*
- *Integrated* ***Gemini AI*** *and* ***GenAI*** *with* ***RAG*** *to generate context-aware summaries and enable natural language Q&A over PDF documents.*
- *Implemented a chat-based interface for users to query document content, enhancing accessibility and usability for students, researchers, and professionals.*
- *Solved real-world challenges by making complex documents searchable and understandable through* ***AI-driven insights****, while maintaining infrastructure and process documentation.*

Certificates

- *AWS Certified Cloud Practitioner from Amazon Web Services (AWS)*
- *Microsoft Certified: Azure AI Fundamentals*
- *Google Cloud Digital leader*

Achievements

- Earned *a* ***Junior Rockstar*** *Award from my Engagement Delivery Lead*
